

# Adopt-a-Float Overview

## How can you use the float and its data in your classroom?

- Use the accompanying lesson plans to teach students about oceanic properties and why they are important.
- Teach students about the ocean and the impact of climate change.
- Engage with scientists out in the field.
- Set up a call with your float's scientist to learn more about deployment, data collection, and so much more!

## What is the naming process and designing process?

- As a classroom, you get to choose a name for your float!
- You may also include design ideas, and the scientists will be decorating the float before deploying it.

## How can you get in touch with other teachers/classrooms?

- Using social media, you may be able to find other teachers who are also participating in the Adopt-a-Float program.
- Contact us! Reach out to us via email at [info@go-bgc.org](mailto:info@go-bgc.org) and we will get you connected with other teachers around the country.

## What is the sticker contest and how do I enter?

- All participants will have the option to design stickers for the Adopt-a-Float program, and the winner will be chosen by our team.
- More information will be shared with you via email.
